WHERE QUALITY MATTERS.

A door is never just a door. It is the boundary between rooms and moments — the weight of it in your hand, the way it sits in its frame, the finish that holds its colour after years of daily use. These details are what this catalogue is about.

Since 1984, Doras has been Ireland's specialist door distributor — a second-generation family business, and the country's exclusive partner for Erkado, Proma, Norma and Daiken. Four of Europe's most respected door manufacturers. One reliable source.

In these pages you will find close to 150 door designs: contemporary CPL flush doors, glazed statement pieces, heritage raised-panel oak styles, fire-rated solutions, acoustic wall panels, architectural mouldings, and a full ironmongery range.

Our team is on hand for every order, every technical query, and every delivery — nationwide in 24 to 48 hours.

ABOUT US

OUR STORY

Founded in 1984, Doras Distributors has been in operation for over four decades. We have built a strong reputation for quality products, efficient delivery and after-sales service. Our commitment to product innovation is matched only by our desire to provide our 400+ customer base with dependable, professional support.

SALES SUPPORT

Our knowledgeable and skilled sales staff are on hand for any queries relating to our products or service. Contact us at any time.

DELIVERY

We offer a 24–48 hour nationwide delivery service across all of Ireland. Deliveries outside Dublin are handled by Dachser, a respected German logistics company with full online Track & Trace. Dublin deliveries are managed by Vanspeed.

15-YEAR WARRANTY

The Arte Toscana range of lever handles, locks and hinges carries a 15-year mechanical warranty for non-commercial residential use.

INNOVATION

Bringing new products to market has always been a priority at Doras. We stay in constant contact with our international manufacturing partners, exploring new materials, finishes, colours and construction methods so that our customers are always first to access what's next in door design.

ENVIRONMENT

You can be confident that the timber used in our door and moulding components originates from certified, sustainably managed forests. We continue to source products that minimise environmental impact, as demonstrated by the Daiken and Erkado ranges.

RANGE

Choose from almost 150 door designs spanning modern, contemporary and traditional styles, suitable for any project or design brief. Whether you're specifying for a private dwelling, a commercial project or a fire-rated application, we have the product. Our moulding range extends to over 70 profiles of architrave, skirting and door frame.

ABOUT TIMBER

Timber veneers are a natural material. Variations in colour and grain should be expected. Colours depicted are representative only.

FIND A STOCKIST

Doras products are available exclusively through Ireland's leading builders merchants and door/joinery shops.

Erkado | Shaker Laminate — Winter White

ERKADO

WHITE / GREY

From a family-owned facility in Poland established in 1976, Erkado has grown into one of Europe's most respected door manufacturers — producing over 750,000 doors annually across 16 countries. Their CPL laminate finish delivers exceptional durability, colour consistency and scratch resistance. Available in left-hand, right-hand and reversible configurations, with a choice of frame sizes to suit any opening. Available exclusively in Ireland through Doras.

Erkado | Midnight Grey 1 Lite — glazing bead detail

THE ERKADO RANGE

TWO FINISHES. TWO DISTINCT MOODS. TEXTURE LAMINATE FINISH.

Two carefully considered finishes — each built to the same CPL specification, each suited to a different interior brief. Choose White where you need light and clarity. Choose Grey where you want depth and presence.

WINTER WHITE

Bright, clean and precisely white.
The specification choice for contemporary interiors that need light, clarity and consistency — from new builds to full refurbishments. Where a space needs to breathe, this is the door.

MIDNIGHT GREY

Deep, cool and considered. Midnight Grey holds its own in a thoughtfully designed space without competing with it. A natural complement to white walls, timber floors and brushed metal ironmongery.

DECORATIVE WALL PANELS

3D CLADDING SYSTEMS FOR MODERN INTERIOR WALLS

Erkado decorative wall panels bring depth, rhythm and architectural character to modern interiors. Their refined 3D profiles create a sense of movement and dimension, transforming plain surfaces into striking design features.

Engineered from high-quality MDF and finished with premium CPL textured laminate, Erkado panels deliver a natural wood look with enhanced durability. Designed for internal residential and commercial spaces, they offer a perfect balance of aesthetics, performance and ease of installation.

Erkado | Premium 3D Cladding — Oak

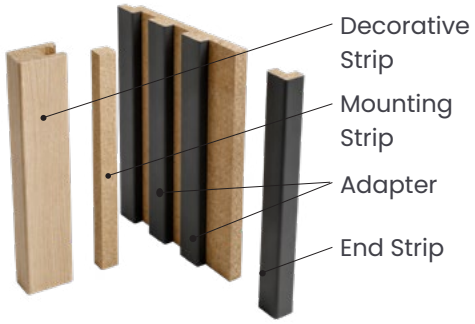

3D PREMIUM CLADDING SYSTEM

Our modular system combines precision-engineered components to create a seamless 3D wall finidh with depth, rhythm and character.

System Assembly

PREMIUM 3D SYSTEM

Size	SKU

Proma | Tacto 7300 FD30 — Glacier Grey

PROMA

TACTO / TRADITIONAL OAK

The Proma range is engineered for those who refuse to choose between contemporary and classic. Two distinct collections — the flat-panel precision of Tacto and the warmth of Traditional Oak — built to the same European specification standard and finished to perform in any Irish interior. One range. Two design directions. No compromise on either.

Proma | Oak Traditional — raised panel detail

THE PROMA RANGE

TWO COLLECTIONS. ONE SPECIFICATION STANDARD.

Two collections under one specification standard. Choose Tacto for contemporary flat panel design in three finishes : Glacier, Basalt or Desert Beige. Choose Traditional Oak where warmth and timber character are the brief.

TACTO

Flat-panel design in Glacier, Basalt and Desert Beige. Clean geometry, smooth surfaces and a finish that holds up to daily use without showing it. The contemporary specification for spaces that value restraint. Available solid or unglazed glass ope.

TRADITIONAL OAK

Warm, honey-toned and honest. The character of real timber without the maintenance of solid wood, a classic panel profile that earns its place in period and contemporary homes alike.

Belgravia | Barcelona — Primed Black, 2 Lite, Clear Glass

BELGRAVIA

BLACK

The Belgravia collection exists for one reason: to make the interior door an architectural statement. Deep black finishes, precision-engineered profiles and narrow stile dimensions that maximise the impact of every opening. Specified by architects and designers across Ireland for interiors where contrast is the brief and compromise is not an option.

Belgravia | Mayfair — groove detail

THE BELGRAVIA RANGE

ONE FINISH. ONE STATEMENT.

One finish. One statement. Belgravia Black is the definitive specification for interiors where contrast and architectural precision are the brief.

BELGRAVIA BLACK

Finished in deep RAL 9005 black with precision-engineered profiles, Belgravia redefines the interior door as an architectural element. Narrow stile and rail dimensions maximise the glazed area where specified, delivering visual impact and light flow in equal measure.

Renaissance | Bergerac — Primed White, 3 Panel

RENAISSANCE

WHITE

The Renaissance range draws on the enduring appeal of classic European joinery. Clean white finishes, refined panel profiles and solid construction make these doors at home in both traditional and contemporary interiors. Where quality of craft and heritage proportion matter, Renaissance consistently delivers — a range that earns its place in the finest homes in Ireland.

Renaissance | Versailles 1 Lite — clear glass, glazing bead detail

WHITE

Discover timeless elegance with the Renaissance collection, where distinctive triple-step panel detailing sets a new standard in interior door design. This sophisticated range brings architectural refinement to your home, with each door crafted to create visual depth and character that elevates any space. Available in both 1 and 3 panel configurations, Renaissance doors offer versatility without compromising on style. The crisp white primed finish provides the perfect canvas for your interior vision, while optional glazing in clear or opal laminate introduces natural light with elegant effect. Complete with complementary skirting and architrave options, the Renaissance range delivers a cohesive, luxurious aesthetic that transforms ordinary rooms into extraordinary living spaces.

European | Salzburg — Silk Grey, 1 Panel, 1 Lite, Clear Glass

EUROPEAN

WHITE / BLACK / SILK GREY

A range built for versatility. The European collection spans white, black and silk grey finishes across a carefully curated selection of panel configurations — from the clean geometry of the Amsterdam to the textured detail of the Milan. Designed for contemporary Irish homes and finished to a specification that outlasts trends.

European | Milan — panel moulding detail

WHITE

Pure and radiant, European White doors bring a fresh, luminous quality to any space. Finished in a sophisticated RAL 9003 shade with beautiful mouldings for added depth, they offer models like Amsterdam (1-panel or lite options) and Arnhem (2-panel designs). Ideal for bright, modern homes, with glazed variants featuring clear bevelled or obscure opal glass for enhanced light flow and privacy.

BLACK

Bold and striking, European Black doors add a dramatic, contemporary edge to interiors. Coated in a sleek matt RAL 9005 finish with intricate mouldings that blend aesthetics and functionality, they include versatile models for seamless integration. Perfect for creating contrast in stylish settings, available in solid or glazed styles with clear or obscure glass to balance elegance and seclusion.

SILK GREY

Soft and refined, European Silk Grey doors deliver a subtle, luxurious vibe with a smooth RAL 7044 texture. Highlighting models like Prague (1-panel or lite configurations) with raised mouldings for a premium touch, they're suited for serene, upscale environments. Choose from solid doors or glazed options with clear bevelled or obscure opal laminate glass for optimal light diffusion and privacy.

Daiken | Black on White — 6 Lite, Opal Laminate Glass

DAIKEN

BLACK ON OAK / BLACK ON WHITE GREY / WALNUT

Daiken combines engineering precision with contemporary European design. The collection offers a refined palette of finishes including black on oak, black on white, grey and walnut, alongside a dedicated acoustic panel range for spaces where sound control matters as much as aesthetics. Every Daiken door rewards close specification and installs to an exacting standard.

Daiken | Walnut — woodgrain and shaker panel detail

BLACK ON OAK

Striking Black on Oak doors blend warm oak laminate with bold black beads for a two-tone effect. In shaker styles like 1-panel or 6-lite, they offer scratch resistance and UV stability. Ideal for modern spaces, with clear or obscure opal glass glazing for light and privacy.

BLACK ON WHITE

Clean Black on White doors pair crisp white laminate with sleek black beads for high-contrast appeal. Built with for strength, these shaker designs suit minimalist interiors. Available in solid 1-panel or 6-lite glazed with clear toughened or obscure glass.

GREY

Subtle Grey doors feature textured laminate with bead accents for elegant neutrality. Durable with reducible edges and stable core, perfect for transitional homes. Options include 4-panel or flat designs, glazed with clear or opal glass for serene ambiance.

WALNUT

Rich Walnut doors highlight natural wood-effect laminate in classic shaker rails and panels for warm appeal. With construction and painted hardwood edging for wear resistance, suited for cozy settings. Glazing choices like clear or obscure opal enhance light and privacy.

DAIKEN ACOUSTIC WALL PANELS

DECORATIVE ACOUSTIC PANELS FOR MODERN INTERIOR WALLS

Daiken Acoustic Wall Panels bring warmth, texture and visual rhythm to modern interiors. Designed as a decorative feature wall solution, the panels create a refined linear effect that adds depth and character to residential and commercial spaces.

Available in four contemporary finishes, the range complements the existing Daiken door collection and allows interiors to be coordinated with a clean, architectural finish. Each panel is constructed with an MDF core and finished in a durable textured laminate for everyday performance and longlasting visual appeal.

Daiken | Acoustic Panels— Oak

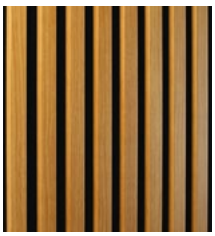

DAIKEN ACOUSTIC PANEL RANGE

Available in four carefully selected finishes, Daiken Acoustic Wall Panels offer a simple way to create warm, textured and contemporary interior walls. Each finish is supplied in the same panel size, making the range easy to specify across different design schemes.

Available Finishes

Grey

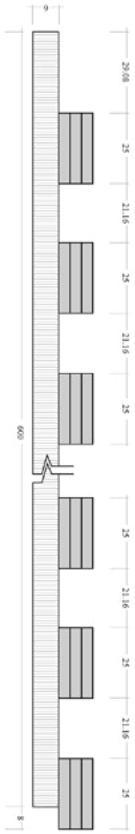

Oak

Walnut

Graphite

A bold dark finish that creates a strong architectural statement for contemporary interiors.

Contract | Pegasus — 1 Lite, Clear Glass

CONTRACT

WHITE / OAK / FD30

Designed for the trade. The Contract range delivers a consistent, practical solution for residential developments, commercial fit-outs and multi-unit schemes. Primed and ready to paint, with FD30 fire door options available throughout, Contract balances performance, value and ease of installation across every project type — backed by the Doras 15-year guarantee.

Contract | White Hydra — grooved panel detail

WHITE

Crisp and luminous, Winter White doors infuse spaces with a fresh, airy vibe. Featuring a premium CPL laminate for superior scratch resistance and UV stability, these doors are ideal for bright, minimalist interiors like kitchens or living areas. Available in solid, glazed, and paneled options for seamless integration.

OAK

Warm and inviting, Oak doors bring natural depth and character to any room. Featuring a genuine oak veneer finish for lasting warmth, these doors are ideal for hallways, living areas, and interiors with a traditional or transitional feel. Available in panelled and glazed options, with clear or frosted glass, for seamless integration.

Java | Shaker — White, 1 Panel

JAVA

WHITE

The Java range brings character and warmth to interior spaces. From the statement presence of the Colosseum to the understated charm of the Shaker configurations, each door in this collection has a personality of its own. Java is the range for clients who want their interior doors to be a considered part of the design, not an afterthought.

Java | Torea 4 Lite — groove and bead detail

COLOSSEUM

Architectural and commanding, Colosseum makes a bold statement with distinctive fluted vertical detailing. Drawing inspiration from classical architecture reinterpreted for contemporary interiors, the pristine white finish creates captivating play of light and shadow.

SHAKER

Timeless and refined, Java White Shaker brings classic American design to contemporary interiors. Featuring iconic flat-panel construction with clean recessed panels framed by simple rails and stiles, the crisp white finish creates versatile elegance.

TOREA

Contemporary and distinctive, Torea features unique panel arrangement creating dynamic visual interest. Modern interpretation of traditional panel construction offers geometric sophistication through carefully proportioned elements.

NEMA

Sleek and minimalist, Nema represents contemporary design at its most refined. Featuring subtle linear detailing creating understated texture, the smooth white finish integrates seamlessly into modern architectural schemes.

Victoria | Victoria — White, 2 Lite, Clear

VICTORIA

TRADITIONAL

There is a reason traditional door styles endure. The Victoria collection is crafted for homes where heritage details matter — where panel profiles, proportions and solid construction are as important as finish. Classic in its references and uncompromising in its quality, Victoria is for interiors where character is built in from the beginning.

Victoria | Traditional 2 Lite — glazing bead detail

TRADITIONAL

Elegant and enduring, Victoria Traditional doors bring authentic period styling to contemporary homes. Featuring classic raised or flat panel construction with substantial rails and stiles, these doors embody quality craftsmanship. Perfect for period restorations or new builds seeking traditional character. Available in 2-panel and 4-panel designs with optional glazing.

Arctic | Carrara — White, 2 Panel Smooth

ARCTIC

SMOOTH / WOODGRAIN

Clean, considered, precise. The Arctic range is designed for modern interiors that demand simplicity without compromise. Smooth white finishes and minimal profiling create doors that sit quietly within a scheme or hold their own as a design statement. A consistent, reliable specification for contemporary Irish homes that value restraint.

Erkado | Arctic Woodgrain Classique — panel moulding detail

SMOOTH

Pure and serene, Arctic Smooth delivers minimalist perfection with flawlessly flat surface and pristine white finish. The smooth surface reflects light beautifully, enhancing space and brightness. Ideal for modern apartments, Scandinavian-inspired homes, or contemporary spaces celebrating simplicity.

WOODGRAIN

Textured and refined, Arctic Woodgrain brings subtle organic warmth to contemporary interiors. Featuring delicate woodgrain texture embossed into white surface, this finish offers clean aesthetics with tactile interest. The subtle grain creates gentle shadow play adding dimension. Perfect for Scandinavian-inspired interiors, coastal modern homes, or transitional spaces.

Fire Doors | GC06 — Oak Veneer, 1 Lite, Clear Glass, FD30 | GC01 — White, 1 Lite, Clear Glass, FD30

FIRE DOORS

RESIDENTIAL / COMMERCIAL

Fire safety and good design are not mutually exclusive. The Doras fire door range covers FD30 and FD60 ratings across residential and commercial applications, in styles that mirror the wider Doras portfolio. Every door in this range is tested, certified and built to protect — without asking you to compromise on the appearance of your space.

Fire Doors | Oak Door Frame — intumescent seal detail

RESIDENTIAL

Designed for modern living spaces, the residential fire door range brings together safety, durability and style. A choice of high-quality finishes and designs allows each door to sit comfortably within a wide variety of interiors while still providing dependable fire performance. Ideal for apartments, homes and multi-unit residential projects, this range offers a practical and elegant solution for everyday living.

COMMERCIAL

Built for high-use environments, the commercial fire door range is suited to spaces where performance and compliance are essential. Robust construction, certified fire resistance and a professional finish make these doors ideal for offices, hospitality settings, public buildings and larger developments. The result is a practical, reliable solution that also maintains a strong architectural appearance.

Proma | Tacto 7300 — Glacier Grey

RESIDENTIAL

The residential fire door range combines certified fire performance with finishes suited to modern homes. Each door is sourced from manufacturers whose cores, construction methods and intumescent seals meet the requirements for certified fire resistance, giving specifiers and installers confidence in both compliance and finish quality.

The range covers timber veneers, painted profiles and flush designs, allowing a consistent finish across apartments, houses and multi-unit residential projects. Imperial and metric sizes are stocked as standard, with oversized and off-standard sizes available to order.

All residential fire doors are certified to the relevant European or British standards, with certificates available on request. Matching frames, intumescent seals and approved ironmongery are supplied alongside the doors, allowing the full assembly to be specified as a tested, compliant system. The Doras technical team is available to advise on compliance, approved materials and installation.

DORAS
where quality matters
Fire Doors | Pre-Primed — White, FD30/FD60

COMMERCIAL

The commercial fire door range is suited to high-use environments including offices, hospitality, healthcare, education and larger mixed-use developments, where certified performance and a durable finish are both required. Each door combines a robust core and tested fire resistance with finishes that stand up to continuous daily use.

The range covers veneers, paint-grade profiles and bespoke options to support consistent finish schedules across commercial projects. Imperial and metric sizes are stocked as standard, with oversized and off-standard sizes available to order. A bespoke fire door design service is available for projects with non-standard sizes, ratings or finish requirements.

Every door is supplied from manufacturers with full accreditation from the relevant testing authorities, and certificates are available on request. Where required, doors can be supplied with tested ironmongery sets, ensuring the door and hardware are approved for use together. The Doras technical department is available to advise on compliance, approved materials and installation.

Ironmongery | Arte Toscana — Siena, Satin Nickel

IRONMONGERY

HANDLES · HINGES · LOCKS · DOOR KITS

Ironmongery is the last decision and the first thing you touch. The Doras ironmongery range covers two distinct collections — Arte Toscana for decorative hardware and Arrone for practical specification — curated to complement every door in this catalogue. Selected for quality of construction, durability of finish and ease of installation.

THE IRONMONGERY RANGE

TWO COLLECTIONS. TWO DIFFERENT BRIEFS.

Two collections, two different briefs. Choose Arte Toscana where the hardware is part of the design statement. Choose Arrone where locking performance, hinges and door kits lead the specification.

ARTE TOSCANA

Italian design sensibility applied to door hardware. Lever handles, roses and accessories in finishes that complement the full Doras door collection, including polished chrome and satin. Selected for quality of cast, precision of fit and durability of finish.

ARRONE

The practical specification, done properly. Multipoint locking systems, hinges, door closers and complete door kits, each component engineered for performance, ease of installation and long-term reliability.

Ironmongery | Arte Toscana

ARTE TOSCANA

ITALIAN DESIGN. LASTING QUALITY.

Italian craftsmanship applied to the details that matter most. Each Arte Toscana handle is precision-cast, laboratory tested to 200,000 operations and backed by a 15-year mechanical guarantee. Four designs, two finishes : satin nickel and polished chrome.

Mouldings

MOULDINGS

FRAMES & PROFILES

The details that finish a space. Doras mouldings — frames, architraves, skirting boards and profiles — are designed to work in harmony with every door in the range. Available in a choice of profiles and finishes, stocked for immediate availability across Ireland, and specified to the same standard as every product we carry.

THE MOULDINGS RANGE

THE DETAIL THAT DEFINES THE FINISH

PLATINUM

Premium primed mouldings engineered for a clean, consistent finish. Available across door frames, architraves and skirtings, with FD30 options.

DAIKEN

Contemporary laminate Shaker profiles in modern Grey and Walnut finishes. A coordinated range of frames, architraves, skirtings and tee lippings.

TACTO

Textured architectural profiles available in refined modern finishes. Designed to add depth, warmth and detail to contemporary interiors.

NORMA

Door frame solutions available in classic White, Veneered Ash and Oak finishes. Includes fire-rated and standard options for coordinated installations.

MAHOGANY

Traditional solid mahogany mouldings with a warm, classic timber appearance. Ideal for matching heritage-style doors and refined interior finishes.

MDF MOULDINGS

Primed MDF mouldings in four profiles for residential and commercial internal use. Available as architrave and skirting, supplied ready to paint.

THE PLATINUM MOULDINGS DIFFERENCE

Premium FSC-certified timber mouldings, crafted from knot-free*, kiln-dried Radiata pine, deliver unmatched consistency (±0.4mm tolerance) and a deluxe primed finish. Designed for builders, architects, and designers, Platinum Mouldings redefines luxury and durability in architectural mouldings.

THE DORAS STANDARD

SUPPORT · RESPONSIBILITY · PROTECTION

Everything in this catalogue is specified to the same standard. The pages that follow set out what that standard means beyond the product: how we source responsibly, how we support every stockist who carries our range, and what we stand behind when a door leaves our warehouse and enters your customer's home.

BUILT TO LAST.
RESPONSIBLY SOURCED.
At Doras, quality and responsibility are the same standard.

OUR RESPONSIBILITY

Every Doras door begins as timber. We take that seriously — sourcing from certified, sustainably managed forests and working with manufacturing partners whose processes minimise environmental impact. Long-lasting products are inherently sustainable. When a door lasts decades, less ends up in landfill.

CERTIFIED TIMBER

All timber used in our door and moulding components is sourced from certified, sustainably managed forests. You can specify Doras products with confidence that the natural materials behind them have been responsibly harvested.

LOWER ENVIRONMENTAL IMPACT

We continuously review our range to prioritise products and processes that reduce environmental footprint. The Daiken and Erkado ranges are examples of this commitment in practice, engineered for performance with a lighter burden on the environment.

BUILT FOR LONGEVITY

Sustainability is not only about sourcing. It is about durability. A door built to last decades is a door that does not need replacing. Every product in this catalogue is specified to perform for the long term. That is quality. That is also responsibility.

INNOVATION WITH PURPOSE

We work closely with our international manufacturing partners to explore new materials, finishes, and construction methods, including eco-friendly alternatives that reduce environmental impact without compromising on design or performance.

Berkeley — Black, 3 Lite, Reeded | Shaker — White, 1 Panel | Salzburg — Silk Grey, 1 Lite, Clear

SHOWROOM SUPPORT

Customers who can see, touch, and compare the range make faster decisions and buy with more confidence. Our display stands, boards, banners, and printed materials are designed around the Doras range and ready to use in your showroom.

All materials are available free of charge to Doras stockists. Talk to your rep to get set up.

DISPLAY STANDS

Let customers touch and compare before they decide. Floor standing units in multiple configurations to suit your showroom layout.

DISPLAY BOARDS

Show the full range at a glance: finishes, colours, and product names, without a salesperson needing to explain it. Counter or wall-mounted.

BANNERS

Make your showroom and trade stand look the part. Pull-up roller banners in internal and external formats.

CATALOGUES & FLYERS

Give customers something to take home. Catalogues, flyers, and door labels that keep selling after they've left your showroom.

PACKAGING

Packaging that makes the sale feel right at the counter. Covers Arte Toscana and Arrone ironmongery ranges.

SHOWROOM ESSENTIALS

The finishing touches that make a showroom feel organised and professional. Catalogue holders, pads, and point-of-sale accessories.

Talk to your Doras representative about equipping your showroom. We will recommend what works best for your space and range.

Email sales@dorasdist.com to get started.

Subject to availability. Materials and specifications may vary.

DORAS DOOR PROTECTION

To ensure your Doras door performs to its full specification and retains its appearance throughout its life, please follow these guidelines for storage, installation, finishing, and ongoing care. Adherence to these procedures is a condition of the Doras door guarantee.

STORAGE & HANDLING

- Store flat in a dry, well-ventilated space. Never store on edge or on end.
- Keep the protective wrapping on the door until installation.
- Do not store in damp or freshly plastered rooms. Moisture causes swelling and distortion.
- Do not expose natural finish doors to direct sunlight. UV causes fading and discolouration in timber and veneers.
- Condition the door to its installation environment before hanging.
- Seal all faces, edges, and cut-outs (locks, hinges, glass rebates) as soon as possible after delivery and before the door is exposed to any damp conditions. End grain must be fully protected, as this is where moisture causes splitting and warping.

INSTALLATION

Ironmongery guidance below applies to standard internal domestic doors. Fire rated doors require certified fire door ironmongery, fitted in accordance with the door's fire certificate.

- Ensure the installation area is completely dry before hanging, particularly in freshly plastered rooms.
- Use hinges of Grade 11 or better.
- Use three hinges on doors over 20kg and on doors where opposing face conditions differ (bathrooms, airing cupboards).
- Fit all ironmongery (locks, latches) before hanging the door.
- Do not fit a mortice lock through the mid-rail joint. Always position above or below.
- Do not rebate double doors. Doing so will nullify the guarantee.
- Fire doors must not be altered on site. All cut-outs and modifications require prior approval from the manufacturer or fire officer.

IMPORTANT

Please inspect your Doras door immediately upon delivery, before removing it from its packaging. Any physical defects should be reported at once. Where damage is visible through the packaging, do not open. Report immediately. No claim will be accepted where inspection prior to unpacking would have identified the defect.

Any defects detectable only after removal of packaging must be reported immediately upon discovery.

FINISHING

- Ensure the door is clean, dry, and at a suitable moisture content before finishing.
- Sand lightly in the direction of the grain and remove all dust before applying finish.
- Apply finish to both faces and all four edges, including top, bottom, and all cut-outs.
- Use a minimum of three coats: primer, undercoat, and one finishing coats. Good oil-based paint or quality joinery treatment, not water-based.
  A base coat primer is not a seal.

MAINTENANCE

- Inspect annually and carry out any necessary touching up to prevent deterioration of the timber.
- Frosted glass: clean with warm water and a soft sponge.
- Do not use wax polishes, dyes, or oils on veneered surfaces. Speak to the manufacturer before applying any product to your door finish.
- Lubricate hinges, locks, and handles annually to keep all ironmongery operating smoothly.

GUARANTEE

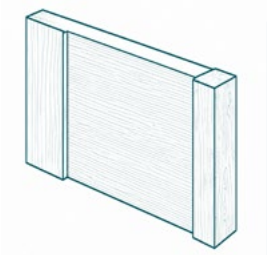

Every Doras door is built to perform. Where a door is found to be defective in materials or workmanship, we will provide a replacement door free of charge.

The guarantee applies where the storage, installation, finishing, and care guidelines in this catalogue have been followed in full. It covers the door only. Re-hanging, painting, and associated costs are not included.

HOLLOW CORE
Lightweight internal use

DOOR CONSTRUCTION

All Doras internal and external doors are built using engineered component parts. This construction method provides the solid feel of a traditional door with the added benefits of dimensional stability, consistency, and resistance to movement. Engineered doors perform reliably across the varying temperature and humidity conditions found in Irish homes. All our engineered doors are faced with high-quality veneers and matching solid lippings, ensuring a consistent finish across the full door face and edges.
